1. Introduction

PCC Connect Hub is a comprehensive school management system built for Progress Christian Centre. It streamlines student registration, fee tracking, attendance management, timetable scheduling, and communication — all in one modern, secure platform.

The system supports three user roles: **Administrators**, **Teachers**, and **Students**. Each role has its own dedicated portal with tailored features and permissions.

2. Getting Started — Admin Portal

The Admin Portal is the central control hub. Administrators access it by logging in with their admin credentials and entering the security PIN.

Key Features:

- Dashboard with real-time student count, fees collected, and collection rates
- Student management — register, search, filter, generate ID cards
- Fee structure configuration by form, gender, and beginner status
- Payment recording and receipt generation with QR verification
- Class roster views with attendance and fee summaries
- Timetable generation with conflict detection
- Announcements and SMS notifications

3. Student Registration & Accounts

Registration Process:

1. Admin navigates to Students → Register Student
2. Enters student details: name, gender, form, stream, beginner status
3. System generates a unique 6-character registration number (e.g., K0023T)
4. Admin shares the registration number with the student
5. Student visits the Setup Account page and enters their registration number
6. System auto-generates a secure password and displays it to the student

7. Student records the password — it cannot be recovered, only reset by admin

Beginner vs Non-Beginner: Beginners are new students who pay additional one-time fees (uniforms, books, admission). After their first payment, the system automatically marks them as non-beginners for subsequent terms.

4. Fee Management & Payments

The fee structure is fully configurable. Administrators set up fee requirements specifying which forms, genders, and student types (beginner/returning) each fee applies to.

Fee Rates (Current):

Category	Amount (USD)
Forms 1–4 Non-Beginners	$270/term
Forms 1–4 Beginners	$320/term
L6/U6 Arts & Commercials Non-Beginners	$275/term
Sciences (F3–F6)	$285/term
L6/U6 Sciences Beginners	$335/term

Payments can be recorded via bank transfer, mobile money, or cash. Each payment generates a tamper-proof receipt with a QR code that can be verified at **pcc-connect-hub.lovable.app/verify**.

5. Attendance Tracking

Teachers mark daily attendance from their portal. The system supports three statuses: **Present**, **Absent**, and **Late**. Quick actions allow marking all students present or absent with a single click.

Attendance data feeds into the Class Roster view, where administrators and teachers can see attendance percentages and identify at-risk students (below 60% attendance).

6. Timetable Management

The timetable system provides AI-assisted scheduling aligned with ZIMSEC requirements. Features include:

- Automatic clash-free scheduling with conflict detection
- Support for breaks, lunch, and sports periods
- Interactive master timetable grid with inline editing
- A3 landscape PDF export with school branding
- Individual teacher and student timetable views

7. Announcements & Notifications

Administrators can post announcements visible to all users, or targeted to students or teachers only. Announcements support priority levels (Normal/Important).

SMS notifications can be sent directly from the admin panel using the **Send SMS** feature. Custom messages can be typed and sent to any phone number. The system also sends automated notifications for student registration and fee payments via WhatsApp/SMS.

8. Teacher Portal

Teachers have access to:

- **Dashboard** — Quick access to all teacher features
- **Mark Attendance** — Daily attendance register with tap-to-toggle interface
- **Class Roster** — View registered students with attendance summaries
- **My Timetable** — Personal weekly lesson schedule
- **Announcements** — View school-wide and teacher-specific notices

9. Student Portal

Students can:

- View their dashboard with profile info and fee balance
- Check payment history and download receipts
- View their class timetable
- See fee requirements and breakdowns
- Read announcements

10. Reports & Analytics

The admin dashboard provides real-time analytics including fee collection by form, payment method distribution, and collection rate tracking. Reports can be exported in CSV and PDF formats.

11. About the Developer

Takudzwa "Harry" Singo

Software Engineer

Takudzwa Singo — known to many as Harry — is a 29-year-old software engineer hailing from the vibrant community of Mkoba 6 in Gweru, Zimbabwe. With a deep passion for building technology that solves real-world problems, Harry has dedicated his career to creating digital solutions that empower communities and institutions across Zimbabwe.

PCC Connect Hub was born from Harry's vision to modernise school administration in Zimbabwe. Frustrated by the inefficiencies of paper-based systems and manual record-keeping, he set out to build a platform that would bring world-class school management tools to local institutions — making fee tracking, attendance, and communication seamless and transparent.

Harry's approach to software engineering combines technical excellence with deep empathy for end users. Every feature in PCC Connect Hub was designed with teachers, students, and parents in mind — from the tap-to-toggle attendance register to the auto-generated student passwords and tamper-proof payment receipts.

Beyond coding, Harry is committed to Zimbabwe's tech ecosystem. He believes that technology built locally, for local needs, is the key to sustainable development. His work on PCC Connect Hub demonstrates that Zimbabwean developers can build enterprise-grade solutions that rival anything on the global stage.

"Technology should serve people, not the other way around."
